

Targeted insights from GRC Solutions

The GRC Solutions Consulting Team works alongside Boards and Directors by delivering a range of sector specific board briefings from an independent perspective.

Receive sector specific insights on current corporate governance, risk, and compliance issues from leading experts at a Director and Board level.

Generates targeted opportunities to meet your professional development requirements.

Be confident the topics covered are legally accurate and reflects best practice. This is because the content is curated by a team of in-house experts and respected external consultants.

Encourages flexibility with face to face or digital options available to align with your Board meeting schedule.

Engage with Subject Matter Experts to discuss what's next for Boards and the road ahead for your sector.

CPS230 Consultation

Your business' operational risk management compliance

Vito Giudice

GRC Solutions' Risk and Compliance Consultant

CPS 230 is redefining the approach to operational risk management for APRA-regulated entities.

Entities are required to meet several deadlines throughout 2024 including the identification of material service providers and critical operations by mid-2024 and setting tolerance levels by the end of 2024.

GRC Solutions and Vito have partnered with financial institutions to support their efforts in meeting CPS 230 requirements. Specifically, this includes:

- Performing a gap analysis of your current operational risk management practices against CPG 230
- Identifying gaps and opportunities for better practice to enable alignment with CPS 230; and
- Provide a report of findings and recommendations, with actions, to support your journey to compliance with CPS 230 by 1 July 2025.

Vito is a highly experienced governance, risk management and regulatory compliance professional and has held senior positions including as a Chief Risk Officer of an Australian insurer and as an Executive Director with a global Big 4 accounting and advisory firm.

Vito has developed a versatile combination of deep functional knowledge of Australia's financial services risk and regulatory landscape, stakeholder management, leadership skills and experience in strategic thinking in the context of governance, risk management and regulatory compliance.
